EDUCATION

University of Texas at San Antonio | B.S. Computer Science | GPA: 3.92 | Expected Dec. 2027

- Data Science Concentration | President's List: Spring 2025, Spring 2026

SKILLS & CERTIFICATIONS

Languages & Tools: Python, SQL (MySQL), Excel, Tableau

Data Analytics: PivotTables, XLOOKUP, SUMIFS, AVERAGEIFS, A/B Testing, Data Cleaning, Data Visualization, Dashboard Design

Certifications: Data Analysis, Data Visualization, AI Professional Skills

EXPERIENCE

The Global Career Accelerator | *Data Analytics and Visualization Intern* | Remote May, 2026 - August, 2026

- Conducted data analysis using Excel, including advanced functions, PivotTables, and data visualizations.
- Built interactive Tableau dashboards and analyzed A/B testing results to produce data-driven business recommendations.
- Collaborated with a global team to analyze datasets and deliver accurate, deadline-driven projects.

Roasted | *Culinary Associate* | Montgomery, TX August 2024 - Present

- Managed food preparation, inventory, and daily operations in a fast-paced environment.
- Collaborated with team members and resolved customer issues while maintaining efficient service.

PROJECTS

Grammy.com Performance Analysis | [Grammys-Analysis](#) July 2026

- Analyzed website traffic and engagement data using **Excel** to evaluate the impact of separating Grammy.com and RecordingAcademy.com, measuring changes in key performance indicators including bounce rate, pages per session, and session duration.
- Applied **PivotTables, XLOOKUP, SUMIFS, and AVERAGEIFS** to integrate, segment, and analyze website datasets, identifying a **49% increase in pages per session** and a decrease in bounce rate from **41.6% to 33.7%** for RecordingAcademy.com.
- Analyzed visitor behavior and device usage, finding that **73.7% of Grammy.com traffic originated from mobile devices**, and translated findings into data-driven recommendations for mobile optimization and website strategy.

Intel Sustainability Analysis | [Intel-Sustainability](#) August 2026

- Analyzed **548K+ energy records** using **Tableau** to identify trends in electricity demand, energy generation, and renewable energy adoption across U.S. regions.
- Built interactive dashboards with **calculated fields, parameters, and time-series visualizations** to evaluate supply-demand relationships and changes in energy generation.
- Quantified renewable energy adoption across regions, identifying the **Northwest as the leading region at 52% renewable generation**, while comparing regional production surpluses and deficits.

ISpyGameDatabase | [GitHub](#) May 2026

- Built a **Python data ingestion script** to extract game data from the IGDB API and load it into a normalized MySQL relational database spanning games, developers, platforms, languages, categories, users, and wishlists.
- Developed analytical SQL with **joins, subqueries, aggregates, recursive CTEs, triggers, stored procedures, and functions** to analyze wishlist and rating patterns while automating workflows and maintaining auditable data changes.
